Six staff, hundreds of repeated questions

6

support staff covering WhatsApp and the app

100s

of repeated patient questions every day

Hours

to get a reply, so patients give up

What goes wrong: requests are abandoned, and some patients arrive at the wrong clinic.

Our goal: a first reply in seconds for routine questions, so staff can focus on complex and sensitive cases.

Live demo: safe, simple answers

Service areas

Lists Yaba, Lekki, Wuse 2 and Bodija. Nothing else is invented.

General guidance

Cautious tips for symptoms. No diagnosis, no prescription.

Price question

Admits it has no current figure and refers to human support.

Hi, I live in Yaba. Can you tell me your opening hours and if my HMO covers a malaria test?

Hi! CareLink Naija does have a verified service area in Yaba, Lagos. I don't have current opening hours or HMO/NHIA coverage details for a malaria test. Please contact CareLink Naija human support for the latest hours and to check your coverage.

Real output from our notebook

Why this persona: trust comes first

Warm, simple English

Friendly and respectful, and clear to patients from all backgrounds.

Never diagnoses or prescribes

Gives general information and points patients to a clinic.

Stays on healthcare

Politely redirects unrelated questions back to CareLink Naija services.

Never invents or pretends

No made-up prices, hours or coverage, and no claiming to complete a booking.

Limitation solved: no invented prices

BEFORE: generic prompt

"How much is a malaria test and consultation in Naira?"

The model invented price ranges, for example about ₦3,000 to ₦8,000 for a private clinic visit.

It sounds helpful, but these are not CareLink Naija's prices.

AFTER: guardrail in the system prompt

"How much is a malaria test and consultation in Naira?"

The assistant says it does not have current prices and asks the patient to contact human support to confirm.

Honest, safe and helpful.

The fix: a negative constraint that forbids inventing prices, HMO coverage or opening hours, plus a referral to human support.

Faster first replies, safer patients

What CareLink Naija gets

- Faster first response to routine questions
- Staff freed for complex cases
- A consistent, trustworthy voice

Honest next steps

- Connect live clinic, pricing, HMO and booking data
- Add emergency detection that runs locally, before any API call
- Clinical review before real patients use it

Thank you. Questions?
